Freedom and Determinism

How can we be free in a world of causes?

George Matthews, Pennsylvania College of Technology

2020

Thomas Hobbes 1588-1679

"What is the heart but a spring, and the nerves but so many strings and the joints but so many wheels giving motion to the whole body?"

"What is the heart but a spring, and the nerves but so many strings and the joints but so many wheels giving motion to the whole body?"

Thomas Hobbes 1588-1679

 Hobbes was an early materialist who sought mechanistic explanations for everything humans did.

"What is the heart but a spring, and the nerves but so many strings and the joints but so many wheels giving motion to the whole body?"

Thomas Hobbes 1588-1679

- Hobbes was an early materialist who sought mechanistic explanations for everything humans did.
- Hobbes' account of the origins of society assumes only that we each seek our own gain and will only cooperate if forced to do so.

"What is the heart but a spring, and the nerves but so many strings and the joints but so many wheels giving motion to the whole body?"

Thomas Hobbes 1588-1679

- Hobbes was an early materialist who sought mechanistic explanations for everything humans did.
- Hobbes' account of the origins of society assumes only that we each seek our own gain and will only cooperate if forced to do so.
- In spite of this he does appeal to our ability to *freely choose* to create a society as the moral foundation of the social order.
 This raises a difficult question...

Everything that happens has a cause.

We are often free to choose to do one thing or another.

Everything that happens has a cause.

We are often free to choose to do one thing or another.

PEach of these claims seems to be true on its own, but can they all be true at the same time? It is hard to see how.

Everything that happens has a cause.

We are often free to choose to do one thing or another.

Either we are caused, but not free; free but not caused; or somehow free and caused at the same time. This gives us three philosophical strategies for discussing freedom.

Everything that happens has a cause.

We are often do one thing or another.

Determinism accepts that everything has a cause and that causes and freedom are incompatible, and so denies that we are really free.

Everythin Falsopens has a

We are often free to choose to do one thing or another.

Libertarianism accepts that we are free and that causes and freedom are incompatible, and so **denies that everything has a cause.**

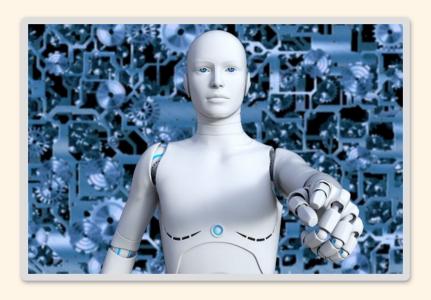

Everything that happens has a cause.

We are often free to choose to do one thing or another.

Compatibilism accepts that we are free and that everything has a cause, and so denies that causes and freedom are incompatible.

If I am cau **Fatts** esomething I am not free to do otherwise.

Freedom is important

Freedom is important

• Our lives seem to unfold as a series of real choices.

Freedom is important

- Our lives seem to unfold as a series of real choices.
- We hold people responsible for many of their actions and that assumes that they *had* a choice in each case.

Freedom is important

- Our lives seem to unfold as a series of real choices.
- We hold people responsible for many of their actions and that assumes that they *had* a choice in each case.
- Life would seem meaningless without the ability to choose.

Freedom is mysterious

Freedom is mysterious

• Whatever happens seems to have a cause.

Freedom is mysterious

- Whatever happens seems to have a cause.
- Explaining *anything* seems to involve showing why it had to happen, the mechanisms behind the scenes.

Freedom is mysterious

- Whatever happens seems to have a cause.
- Explaining *anything* seems to involve showing why it had to happen, the mechanisms behind the scenes.
- As scientific understanding progresses we may seem more and more like complex machines.

Baron D'Holbach 1723-1789

"Man's life is a line that nature commands him to describe upon the surface of the earth without him ever being able to swerve from it."

Baron D'Holbach 1723-1789

"Man's life is a line that nature commands him to describe upon the surface of the earth without him ever being able to swerve from it."

Baron D'Holbach 1723-1789

 Holbach was impressed by the successes of physics at predicting the motion of objects and foresaw the extension of these successes to explanations of human beings.

"Man's life is a line that nature commands him to describe upon the surface of the earth without him ever being able to swerve from it."

Baron D'Holbach 1723-1789

- Holbach was impressed by the successes of physics at predicting the motion of objects and foresaw the extension of these successes to explanations of human beings.
- For him, our sense of freedom is an illusion, a result of us not knowing what causes us to do what we do.

"Man's life is a line that nature commands him to describe upon the surface of the earth without him ever being able to swerve from it."

Baron D'Holbach 1723-1789

- Holbach was impressed by the successes of physics at predicting the motion of objects and foresaw the extension of these successes to explanations of human beings.
- For him, our sense of freedom is an illusion, a result of us not knowing what causes us to do what we do.
- Does it even make sense to argue about determinism? If the answer we find compelling is pre-determined why bother saying anything at all?

William James 1842-1910

"Of two alternative futures ... both may now be really possible, and the one becomes impossible only [when] the other excludes it by becoming real."

"Of two alternative futures ... both may now be really possible, and the one becomes impossible only [when] the other excludes it by becoming real."

William James 1842-1910 Libertarians like James defend our common-sense understanding of ourselves as free agents.

"Of two alternative futures ... both may now be really possible, and the one becomes impossible only [when] the other excludes it by becoming real."

William James 1842-1910

- Libertarians like James defend our common-sense understanding of ourselves as free agents.
- We experience ourselves as making choices and not as being caused to pick one option over another.

"Of two alternative futures ... both may now be really possible, and the one becomes impossible only [when] the other excludes it by becoming real."

- Libertarians like James defend our common-sense understanding of ourselves as free agents.
- We experience ourselves as making choices and not as being caused to pick one option over another.
- And yet we may wonder whether we can trust our experiences of ourselves. Doesn't science often show us the previously hidden causes of things in our experience?

Compatibilism

Compatibilism

W.T. Stace 1886-1967

"Acts freely done are those acts whose immediate causes are the psychological state in the agent. Acts not freely done [have causes] external to the agent."

"Acts freely done are those acts whose immediate causes are the psychological state in the agent. Acts not freely done [have causes] external to the agent."

W.T. Stace 1886-1967

 Stace offers a distinction between two ways we might be caused as a way out of the debate between determinism and libertarianism.

"Acts freely done are those acts whose immediate causes are the psychological state in the agent. Acts not freely done [have causes] external to the agent."

W.T. Stace 1886-1967

- Stace offers a distinction between two ways we might be caused as a way out of the debate between determinism and libertarianism.
- When we are not free we are caused to do things by external forces; when we are free we *cause* ourselves to certain things.

"Acts freely done are those acts whose immediate causes are the psychological state in the agent. Acts not freely done [have causes] external to the agent."

W.T. Stace 1886-1967

- Stace offers a distinction between two ways we might be caused as a way out of the debate between determinism and libertarianism.
- When we are not free we are caused to do things by external forces; when we are free we *cause* ourselves to certain things.
- Does this account of human freedom simply offer one mystery in place of another? Let's look more closely...

Maybe the debate about freedom and determinism is the wrong debate.

Maybe the debate about freedom and determinism is the wrong debate.

• We can be *caused* to do things in a variety of ways, pushed by internal and external forces acting on us.

Maybe the debate about freedom and determinism is the wrong debate.

- We can be *caused* to do things in a variety of ways, pushed by internal and external forces acting on us.
- Some of these involve having *good reasons* to do one thing or another.

Maybe the debate about freedom and determinism is the wrong debate.

- We can be *caused* to do things in a variety of ways, pushed by internal and external forces acting on us.
- Some of these involve having *good reasons* to do one thing or another.
- Is this is the key to understanding how and when we are free?

Maybe the debate about freedom and determinism is the wrong debate.

- We can be *caused* to do things in a variety of ways, pushed by internal and external forces acting on us.
- Some of these involve having *good reasons* to do one thing or another.
- Is this is the key to understanding how and when we are free?

Consider some examples...

I am not going to work today because I quit.

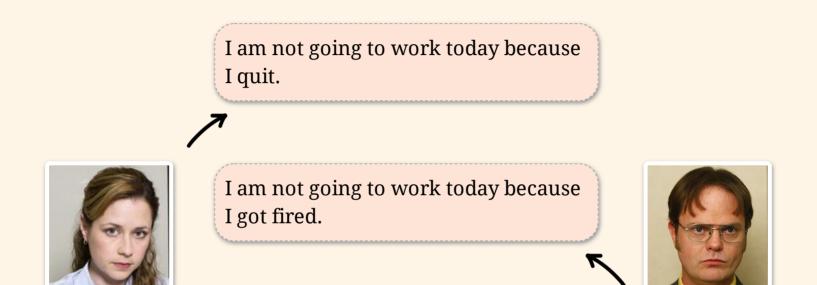

I am not going to work today because I quit.

I am not going to work today because I got fired.

We may quit a job because it doesn't fit in with our carefully considered plans, but given the role of bosses in our society getting fired leaves us no choice.

I gave money to charity because I wanted to help.

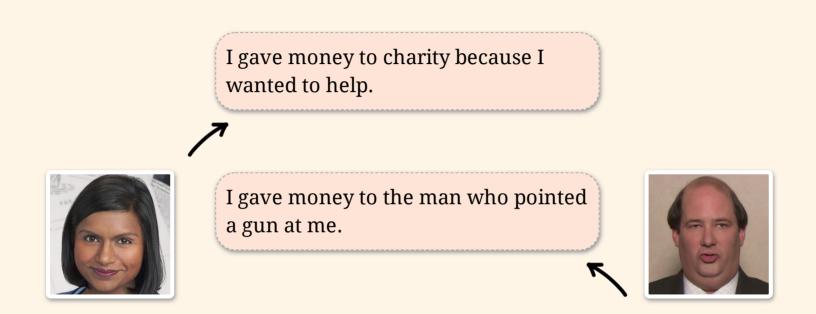

I gave money to charity because I wanted to help.

I gave money to the man who pointed a gun at me.

Threats of force are ways of coercing us to go against our own wishes, acts of charity reflect our own wishes to help others.

I take drugs because I want to relax after a long day at work.

I take drugs because I want to relax after a long day at work.

I take drugs because I am hopelessly addicted and can't stop myself.

I take drugs because I want to relax after a long day at work.

I take drugs because I am hopelessly addicted and can't stop myself.

Addictions can trap us since they can affect brain physiology such that our ability to say "no" to our own impulses is impaired. The line between responsible adult use of potentially addictive substances and behaviors and addiction can be fuzzy.

?

The idea that we have something called free will is difficult to explain. What might possibility explain our ability to initiate actions freely while nothing else that exists seems to have this power?

?

The idea that we have something called free will is difficult to explain. What might possibility explain our ability to initiate actions freely while nothing else that exists seems to have this power?

• Traditionally it was held to be a special power of the human soul, that which connects us with the being who most exemplifies free will, God.

?

The idea that we have something called free will is difficult to explain. What might possibility explain our ability to initiate actions freely while nothing else that exists seems to have this power?

- Traditionally it was held to be a special power of the human soul, that which connects us with the being who most exemplifies free will, God.
- Many scientists doubt that such a power exists and so refer to freedom as an illusion, similar to the illusion that the sun moves in the sky while in fact it is the earth that moves on its own axis.

?

The idea that we have something called free will is difficult to explain. What might possibility explain our ability to initiate actions freely while nothing else that exists seems to have this power?

- Traditionally it was held to be a special power of the human soul, that which connects us with the being who most exemplifies free will, God.
- Many scientists doubt that such a power exists and so refer to freedom as an illusion, similar to the illusion that the sun moves in the sky while in fact it is the earth that moves on its own axis.

But what then about legal and moral concepts of freedom that seem essential to our social lives and understanding of ourselves?

Maybe we should instead talk about "free won't. After all don't we act freely when we learn to say "no" to our own worst impulses?

Maybe we should instead talk about "free won't. After all don't we act freely when we learn to say "no" to our own worst impulses?

 Human freedom depends on the region at the front of the brain called the "pre-frontal cortex" which serves to *prevent* impulses to act from going further.

Maybe we should instead talk about "free won't. After all don't we act freely when we learn to say "no" to our own worst impulses?

- Human freedom depends on the region at the front of the brain called the "pre-frontal cortex" which serves to *prevent* impulses to act from going further.
- Many streams of brain activity, ranging from our instinctual and emotional impulses to our symbolic reasoning, converge here giving us the ability to filter out some impulses and pursue some others based on conscious thought processes.

Maybe we should instead talk about "free won't. After all don't we act freely when we learn to say "no" to our own worst impulses?

- Human freedom depends on the region at the front of the brain called the "pre-frontal cortex" which serves to *prevent* impulses to act from going further.
- Many streams of brain activity, ranging from our instinctual and emotional impulses to our symbolic reasoning, converge here giving us the ability to filter out some impulses and pursue some others based on conscious thought processes.
- Responsible adults are presumed to be able to make delibarate choices in this way.

Jean Paul Sartre 1905-1980

"Freedom is what you do with what's been done to you."

"Freedom is what you do with what's been done to you."

 Sartre's existentialism focuses on our experiences of our lives as we live them "from inside."

"Freedom is what you do with what's been done to you."

Jean Paul Sartre 1905-1980

- Sartre's existentialism focuses on our experiences of our lives as we live them "from inside."
- For Sartre free action is action that we use to make meaning out of the predicaments we find ourselves, to take what is *given* to us by circumstances and make it *our own*..

"Freedom is what you do with what's been done to you."

Jean Paul Sartre 1905-1980

- Sartre's existentialism focuses on our experiences of our lives as we live them "from inside."
- For Sartre free action is action that we use to make meaning out of the predicaments we find ourselves, to take what is *given* to us by circumstances and make it *our own*..
- Living autonomously is a never-ending project of critically reflecting on the causes and conditions which make possible and contrain our lives.
